CAREER OBJECTIVE

Detail-oriented Full Stack Developer with hands-on experience building secure and scalable web applications using Next.js, React.js, Node.js, and MongoDB. Skilled in developing REST APIs, implementing JWT authentication, managing environment configurations, and building dynamic dashboard systems. Strong problem-solving ability with focus on clean architecture, performance optimization, and secure coding practices.

TECHNICAL SKILLS

Frontend:
React.js, Next.js (App Router), JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS

Backend:
Node.js, Express.js, REST API Development

Database:
MongoDB, SQL

Authentication & Security:
JWT Authentication, Role-Based Access Control, Secure Environment Variables

Tools & Technologies:
Git, GitHub, Postman, VS Code, Chrome DevTools

Core Concepts:
API Integration, Dynamic Routing, Client-Server Architecture, State Management, Secure Local Storage Handling

Data Structures & Algorithms (DSA): Arrays, Linked Lists, Stacks, Queues, Sorting & Searching, Recursion, Problem-solving and optimization.

Object-Oriented Programming (OOPs): Encapsulation, Abstraction, Inheritance, Polymorphism, Exception Handling, Interfaces, Classes & Objects.

PROJECTS

Secure and Streamlined Online Government Document Management System (GO-DOCS)

Tech Stack: Next.js, Node.js, MongoDB, JWT

- Developed a secure web platform for managing government-related documents digitally.
- Implemented JWT-based authentication and role-based authorization.
- Designed RESTful APIs for document upload, verification, and tracking.
- Secured backend endpoints using environment variables and validation middleware.
- Improved system performance and ensured structured database schema design.

Client Dashboard API System

Tech Stack: Node.js, Express.js, MongoDB

- Built scalable REST APIs to manage client profiles and dashboard data.
- Implemented CRUD operations with input validation and database optimization.
- Managed Git branching, merge conflicts, and version control workflows.
- Structured backend architecture for maintainability and scalability.

Dynamic Invoice Management System

Tech Stack: Next.js (App Router), React

- Implemented dynamic routing for invoice detail pages using Next.js.
- Handled asynchronous route parameters and optimized data fetching.
- Improved error handling and UI responsiveness for better user experience.
- Structured reusable components for maintainable frontend architecture.

EDUCATION

Master of Computer Applications (MCA)
Surajmal University
2024 – 2026 (Pursuing)

Bachelor of Computer Applications (BCA)
Graphic Era Hill University
Percentage: 73.91%
2021 – 2024

Class XII
Shree Durga Surendra Nath Inter College
Percentage: 82.00%
2020 – 2021

Class X
Azim Premji School, Dineshpur
Percentage: 74.00%
2018 – 2019
